Purdue University Research Repository (PURR)

The PURR service is a collaborative effort of the Purdue University Libraries, Executive Vice President for Research and Partnerships, and Information Technology at Purdue. PURR is a designated university core research facility.

Designated community:

Purdue University faculty, staff, and graduate student researchers; their collaborators; and the current and future consumers of their data.
Data is written into the three pillars of our strategic plan:

- **Learning:** “…information literacy defined broadly to include digital information literacy, science literacy, data literacy, health literacy, etc…”
- **Scholarly Communication:** “Lead in data-related scholarship and initiatives”
- **Global Challenges:** “We will lead in international initiatives in information literacy and e-science and ... contribute to international information literacy, learning spaces, data management, and scholarly communication initiatives.”

USE PROJECT TO COLLABORATE

Create:
- any Purdue faculty, staff, or graduate student researcher can create projects
- describe the project
- disclaim use of sensitive or restricted data
- receive a default allocation of storage
- register a grant award to increase allocation
- invite collaborators to join project

Collaborate:
- git repository to share and version files (sftp & Google Drive integration)
- virtual machine/s
- wiki
- blog
- to-do list management and project notes
- newsfeed
- stage data publications

Creating opportunities for librarians to interact with researchers about data
Librarian is notified by e-mail when a new project is created or a grant is awarded, based on department affiliation of Purdue project owner.

Creating opportunities for librarians to interact with researchers about data
Librarian may consult or collaborate on project if needed.

Creating opportunities for librarians to interact with researchers about data
Librarians review and post submitted datasets.

Creating opportunities for librarians to interact with researchers about data
At the end of initial commitment (10 years), archived and published datasets are remanded to the Libraries’ collection. A librarian working with the digital archivist selects (or not) the dataset for the collection.

Creating opportunities for librarians to interact with researchers about data
2013 was first full year of PURR in operation, to date:
